(cont'd)

1. The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and interesting in the history of science. The author discusses the various theories of the origin of life, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that life is everywhere, and that it is impossible to find a place where it did not originate. The author also discusses the various theories of the evolution of life, and shows that the most plausible is the theory of natural selection. This theory is based on the fact that life is constantly changing, and that the fittest survive. The author concludes that the origin of life is a problem that has puzzled scientists for centuries, and that it is one of the most important and interesting in the history of science.

2. The second part of the paper is devoted to a detailed discussion of the theory of spontaneous generation. It is shown that this theory is based on the fact that life is everywhere, and that it is impossible to find a place where it did not originate. The author discusses the various experiments that have been conducted to test this theory, and shows that they all support it. The author also discusses the various theories of the evolution of life, and shows that the most plausible is the theory of natural selection. This theory is based on the fact that life is constantly changing, and that the fittest survive. The author concludes that the origin of life is a problem that has puzzled scientists for centuries, and that it is one of the most important and interesting in the history of science.

3. The third part of the paper is devoted to a detailed discussion of the theory of natural selection. It is shown that this theory is based on the fact that life is constantly changing, and that the fittest survive. The author discusses the various experiments that have been conducted to test this theory, and shows that they all support it. The author also discusses the various theories of the origin of life, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that life is everywhere, and that it is impossible to find a place where it did not originate. The author concludes that the origin of life is a problem that has puzzled scientists for centuries, and that it is one of the most important and interesting in the history of science.

4. The fourth part of the paper is devoted to a detailed discussion of the theory of evolution. It is shown that this theory is based on the fact that life is constantly changing, and that the fittest survive. The author discusses the various experiments that have been conducted to test this theory, and shows that they all support it. The author also discusses the various theories of the origin of life, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that life is everywhere, and that it is impossible to find a place where it did not originate. The author concludes that the origin of life is a problem that has puzzled scientists for centuries, and that it is one of the most important and interesting in the history of science.

5. The fifth part of the paper is devoted to a detailed discussion of the theory of the origin of life. It is shown that this theory is based on the fact that life is everywhere, and that it is impossible to find a place where it did not originate. The author discusses the various experiments that have been conducted to test this theory, and shows that they all support it. The author also discusses the various theories of the evolution of life, and shows that the most plausible is the theory of natural selection. This theory is based on the fact that life is constantly changing, and that the fittest survive. The author concludes that the origin of life is a problem that has puzzled scientists for centuries, and that it is one of the most important and interesting in the history of science.

NEWMAN W. ADSIT

16 BEECHWOOD LANE  
SCARSDALE, NEW YORK

Nov. 19, 1947.

Secretary or Supt.  
Ernestown Cemetery.  
Ernestown, Ontario.

Dear Sir:

Samuel Lockwood and  
his wife Sarah Adsit - were  
residents of your town and  
parents of their children were  
born and married there.

In preparing a history of  
the Adsit Family I need more  
information about the Lockwood  
Family. Would <sup>you</sup> kindly let me  
know the full birth and  
death dates of the parents and  
children buried in your  
Cemetery. The usual fee will  
be paid for this information.

I must deeply appreciate  
receiving the information from  
your cemetery records or the  
inscriptions on grave stones. If  
you know your fee and I will

it at once.

I hope I may hear from  
you. Thank you.

Very truly yours.

Thomas D. Adair.

# Lockwood

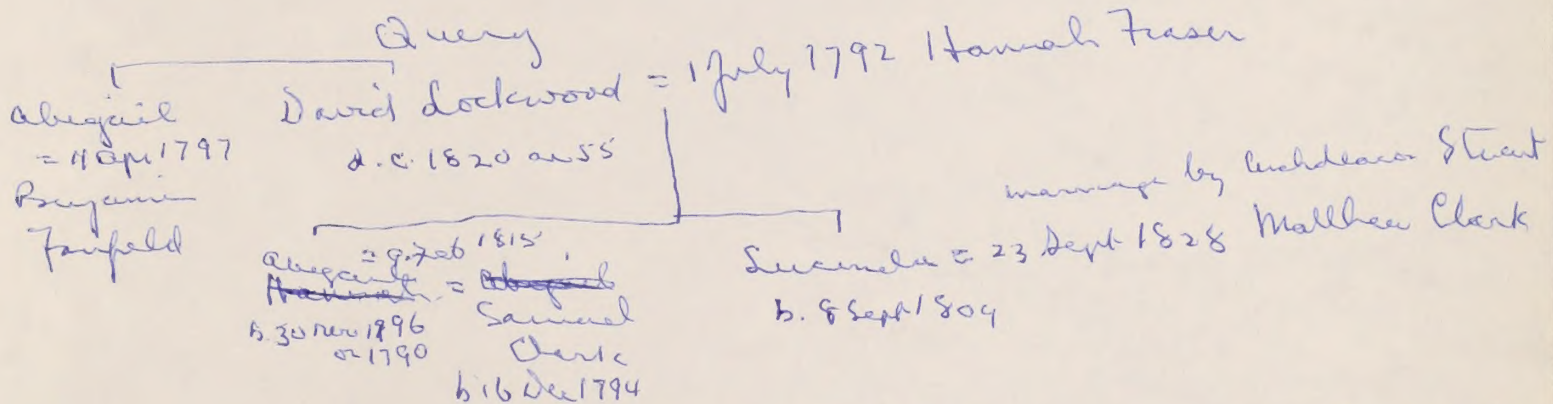

1 July 1792

David Lockwood married Hannah, dau of Daniel Fraser U.E. & his sister Abigail ("Nabby") married <sup>11 Apr 1797</sup> Benjamin Fairfield. His father was in the British service and had been shot in the neighborhood of Lake Champlain. Probably the Lockwoods had lived in Dutchess Co., N.Y. as there were numerous Lockwoods living in that County. His father had been a Sergeant in Burgoyne's army.

Samuel Clark's wife, Abigail Lockwood, whose mother was Hannah Fraser.

David settled on Lot 18 Cone 3 Ernest Town. He died about 1820 aged 55.

Matthew Clark Jr (Lt. Col) (Married Robert) b 8 Feb 1797. married 23 Sept 1828 Lucinda Lockwood, b. 8 Sept 1809 and who was undoubtedly a sister of Abigail who married his older brother Samuel Clark.
